Skills

- Java, CSS, HTML, Python, Spring Boot, SQL, MySQL, Git, REST API, postman, GitHub, AWS, Jenkins, ArgoCD

Experience

Associate Software Engineer, Arivihan Technologies Pvt. Ltd.

Oct 2025 - Present

- Implemented the batch-wise onboarding module and developed RESTful CRUD APIs using Java, Spring Boot, Hibernate/JPA, and MySQL for the Internal Metrics platform.
- Developed backend services for AI-powered features, including Video Interactivity metadata integration and Ask Doubt chat history.
- Enhanced the Excel-based chapter upload by improving validations and returning precise row- and sheet-level error messages.
- Investigated and resolved production issues, including fixing chapter visibility for NEET users through debugging and root cause analysis.
- Contributed to the development lifecycle by raising Git PRs, testing APIs with Postman and Swagger, supporting Jenkins deployments, and monitoring logs using Argo CD.

Java Developer Intern, Health Catalyst

Mar 2025 - Aug 2025

- Developed and maintained RESTful APIs using Java, Spring Boot, and Hibernate/JPA, handling CRUD operations across relational databases.
- Wrote JUnit test cases for provider result inbox retrieval and update endpoints, improving test coverage and application reliability.
- Debugged and resolved authentication issues, strengthening the user login process.
- Implemented missing Liquibase rollback scripts in the Universe-DB module, ensuring safe and reliable database version control.

Projects

E-Commerce Application

- Developed a monolithic e-commerce platform covering product catalog, order management, and secure payment integration.
- Integrated Stripe payment gateway with OAuth 2.0 authentication to enable safe online transactions.
- Optimized API response time from ~500ms to ~50ms using Redis caching, and implemented product search with sorting and filtering via Elasticsearch.
- **Key Technologies:** Java, Spring Boot, Spring Data JPA, MySQL, Redis, Elasticsearch, AWS.

AI-Powered Chatbot with Llama3

- Built an AI-powered chatbot leveraging LLaMA3 (Ollama) to generate contextual, domain-specific responses.
- Implemented a document ingestion pipeline with Retrieval-Augmented Generation (RAG) to answer accurately from PDFs and text files.
- Developed RESTful APIs using Spring Boot with modular services for chat history, document storage, and PDF-to-text processing.
- **Key Technologies:** Java, Spring Boot, Maven, REST API, LLaMA3 (Ollama), RAG, Apache PDFBox.

Education

Scaler, Specialized in Software Development & Problem Solving

2024

- **Coursework:** Data structures and Algorithms, Databases & SQL, Low-Level Design (LLD), Java Backend Development.
- Solved 500+ DSA problems, consistently ranking within the top 10% of learners.

Chhattisgarh Swami Vivekanand Technical University, B.Tech

2021

Specialization: Electrical Engineering
